The first day after euery of the Feasts set downe for euery Terme, the Court of the Arches is kept in the forenoone in Bow Church, & the Admirall Court the same day in the afternoone in Southwarke: The 2 day after euery the said Feasts, the Audience Court is holden in the Consistory in Paules in the forenoone, & Prerogatiue in the same place in ỹ afternoone: The 3 day following euery of these Feasts, ỹ Bishop of Londons Consistory court is holden in Paules in the forenoone, and his Maiesties Court of Delegates, in the same place in the afternoone. The 4 day after the foresaid feasts, his Maiesties Court of high Commission is kept in the Consistory in Paules: or (as it hath bẽn of late) euery weeke in the Terme time, on Thursday in the afternoone at Lambeth. But if any of the dayes before recited be Sunday, or an Holiday, then is such Court kept the day following.

Note also, that in Hilary Terme, 4 of the abouenamed Court-dayes be ordinarily kept, and as many in Easter & Trinity Termes, according to the course of the yeare, as the Iudge of the Arches in his discretion shall thinke good, who at the end of euery Terme appointeth the Court-dayes to bẽ kept in the Terme next following. But in Michaelmas Terme the court dayes for ỹ same before set downe, are certainely kept. I therefore admonish all Countrey men, (but especially those that dwell farre off) cited by any originall Processe, to appeare in the Arches, Audience, Prerogatiue, or Delegates, to send to some Proctor a note of the cause, and to what Court they bẽ cited, to appeare for them, and to returne them word of the very day it shall bẽ nẽdefull for them to appeare in person. But the course of Practise in the high Commission, and the Admirals Court is otherwise: for euery person cited to these Courts, must appeare personally.

Conjectures

Coniectures of weather by the Sun & Moone.

When the Sun riseth cleare, and not red, and is red at her setting, and when the Moone at her prime (which is 3 dayes and 18 houres after the Change) appeares faire & bright, it is a signe of faire weather, but if the Sun at his rising be fire red, or a little after his rising bee couered with great thicke clouds, and at his setting hee be ouer-cast with a thicke mist, or goe downe behind a great cloud, Likewise if the Horne of of the Moone be blunt, or a blackenesse appeare in the midst of her, it is a token of foule weather.

Sero rubens cœlum cras indicat esse serenum,
Sed si mané rubet, venturos indicat imbres,
Pallida Luna pluit, rubicunda stat Alba serenat.

To Iudge of the Weather by the signe, wherein the Moone shall be at the Change, Quarters & Full.

If the Moone doe either change, come to her full, or enter into her first or last quarter in Aries, Leo, or Sageitarius, in Winter, it commonly is faire weather, but in Summer it prognosticateth immoderate heate, and the hotter if it change in June or July. If she happen to change, be at ♄ full or quarters in Taurus, Virgo, or Capricorne, in Winter, iudge of cold weather; but in Summer, it is a signe of temperate Weather. When the said times change in Gemini, Libra, or Aquarius, it is a token of much wind, especially in Autumne, or the Spring time. If the Moone change, be at the full, enter into the first or last quarter in Cancer, Scorpio, or Pisces, in Winter, it foreshewth moyst & rayny weather, or Snow to follow, but in Summer it is a signe of pleasant & temperate weather to follow. Thus obseruing the times of the yeare, with their naturall dispositions, and comparing the same with the temperature of the signes, it will for the most part bring you vnto the knowledge of the weather.
